Re: EL-307 Elev/Rud Hinge Doubler

All SR2500 and Elite customers.

Information: After flying our aircraft for many hours we have discovered movement of the EL-307 Elev/Rud Hinge Doubler. Therefore we are now making them out of .063 6061 T6 material.

Action: For those builders who have not yet completed their Elevator and Rudder please contact our shipping department and they will send you the new parts.

For those builders who have completed their Elevator and Rudder please contact the Technical Department for a fix.
