Murphy Aircraft Arrive at EAA AirVenture 2025

Once again, Oshkosh lived up to its reputation as the heart of the aviation world. The 2025 edition of EAA AirVenture was packed with passionate builders, aviators, and enthusiasts—and Murphy Aircraft was proud to be in the middle of it all.

A Showcase of Innovation & Simplicity

This year, we proudly showcased our Murphy Moose, Rebel, and Radical Easy-build kit. With each aircraft representing the spirit of rugged Canadian design and builder-friendly engineering, our display drew a steady crowd of curious visitors, from first-time builders to seasoned pilots.

Our team and signage set up bright and early, ready to welcome visitors from all over the world.

Veteran builders, first-time visitors, and our team members sharing stories and specs under the summer sun.

Murphy Rebel under the spotlight as families stroll past—look closely for the little superhero in the wagon!

Hands-On Exploration

Builders and dreamers alike took a close-up look at our demo fuselage, where they could step inside and imagine their own Murphy kit coming to life. Questions about build time, component quality, and custom features sparked rich conversations with our team all week long.

Crowds gather under the Rebel wing, deep in technical discussion about performance and build steps.

Inside our open fuselage mockup, visitors get hands-on with the structure—because we believe in transparency, literally.

EAA video crews captured the stunning orange Murphy Moose.

A Community Reunited

What made Oshkosh 2025 special wasn't just the aircraft—it was the people. Builders sharing progress photos. Visitors reconnecting with our team after completing their own Moose or Rebel. Families stopping by just to say, **“One day, I'll build one of these.”** These moments make every show worth it.

Thank You for Flying with Us

We want to extend a heartfelt thank-you to everyone who visited our booth, shared their stories, or asked questions. We're grateful to be part of this amazing aviation community, and we're already counting down the days to next year's show.

Spotlight: Murphy Radical Easy-build Kit

Build Smarter, Not Longer

Behind the scenes, our factory has been hard at work on the Murphy Radical—our most advanced kit to date. This year's Oshkosh showcase gave builders the chance to see just how accessible homebuilding can be.

From factory-prepped parts to snap-fit structures, the Radical is designed for precision, speed, and simplicity. Our Easy-build kit includes:

- ✓ Factory-prepped parts with pre-drilled alignment
- ✓ Snap-fit assemblies and minimal trimming
- ✓ Bolt-&-rivet construction
- ✓ Fast-fit drilling for faster completion

Our team showed off the Radical's key design strengths: intuitive layout, clean structure, and a time-saving workflow that builders at Oshkosh found inspiring.

Whether you're a first-time builder or a veteran looking for your next project, the Radical is built to make your experience smoother and more rewarding.

Endorsement

"We at MooseMods have over 15 years of experience and more than 25 Moose builds under our belts, so we know Murphy Aircraft products inside and out. When we began assembling our new Radical kit, Murphy's promise of an 'Easy Build' proved to be anything but hype. The kit's increased number of pre-drilled components, simple structural assemblies, and virtually no fabrication work meant we could quickly mock up initial fit-ups, step up drilling where needed, and move on to final assembly in record time.

While we'll always love the Moose, its size and capability often exceed the needs of many recreational pilots. After our smooth, efficient build of the Radical airframe, we're proud to add it to our regular Murphy lineup at MooseMods. We're highly confident that pilots seeking a more compact, performance-driven aircraft will find the Radical an ideal match."

— Ray Watson, MooseMods
